

AUTOMATIC CASEMAKER ACTIVE

- Compact & Ideal solution for Book Covers, Box Files, Photo Albums, Clip Pads, Game Boards, Photo Album window pasting & folding, Note Books, Diaries in different sizes. Easy format change over. Window pasting and folding also possible.

Active Features

- No adjustment necessary for size changes.
- Each cover can be of a different size.
- Cost effective, simple and reliable
- Exceptionally wide format range

AUTOMATIC CASEMAKER ACTIVE

Introducing our innovative Case Maker Active series, designed to streamline your binding operations with efficiency and precision. With a focus on operator comfort and control, all operations are seamlessly executed by the operator seated in front of the machine. The operator begins by passing the cover material into the gluing unit, where it receives an even coating of hot gelatin glue, ensuring optimal adhesion for a professional finish.

Equipped with foot switches, our Active model puts the operator in command, allowing for perfect registering of the cover material with the air suction plate. With precision in mind, suction bars manually guide the placement of board pieces onto the cover material, ensuring accurate positioning with every pass.

Experience unparalleled efficiency as the cover material undergoes turning-in on all four edges in just two passes, facilitated by brushes and pressing rollers. For added versatility, our Active Plus model effortlessly handles cases with central window cut-outs, ideal for photo album production. Upon completion, the final product is smoothly delivered to the rear of the machine on an inclined delivery table, ready for your next stage of production. Elevate your binding process with the Case Maker Active series, where precision meets performance for exceptional results.

Technical Data

Min. case size	150mm x 160mm
Max. case size	450mm x 800mm
Paper thickness	80gsm - 170gsm
Board thickness	1.5mm - 5mm
Turning-in width	15mm - 20mm
Production	4 to 6 cases/min (Approx)
Glue	Hot / Cold (Optional)
Power	4.5 HP, 3 Phase, 415 V
Dimensions	1300 mm x L1600mm x W 1400 mm
Weight	600 Kgs.
Gluing System	Bottom
Man Power	One
Materials	Paper, Laminated Paper, Plastic coated Paper, Cloth etc.,
