

AUTOMATIC BOARD TO BOARD PASTING MACHINE

Introducing our Board to Board Pasting Machine, meticulously crafted to cater to both short-run and large-format production needs. Engineered for efficiency and versatility, this machine seamlessly facilitates the pasting of boards, offering unparalleled performance across various formats. With top gluing and friction feeding for the bottom sheet, coupled with manual sheet feeding, our machine ensures precise application for impeccable results.

Following gluing, our Board to Board Pasting Machine features automatic registration, ensuring seamless alignment and precision throughout the pasting process. Additionally, the inclusion of calendaring further enhances the quality of the finished product, guaranteeing a smooth and professional result. Experience efficiency, reliability, and precision with our innovative Board to Board Pasting Machine, designed to meet the diverse demands of modern production environments.

Technical Data

Max sheet size	- 530 x 800mm (21" x 32")
Min sheet size	- 150mm X 120mm (6" x 4.5")
Sheet thickness	- 220-800 gsm
Power Requirement	- 4.5 kw
Voltage	- 440 volts, 3 phase
Air compressor	- 6 bar
Speed	- 1000 sheet / Per. Hr.
Machine dimension	- 3140mm x 1200mm x 1150mm

Features

Megabound board to board pasting machine provides. An efficiency and cost effective method of producing thick printed products on sheet to sheet up to 21x 32(B2+) size

The board to board pasting machine includes a touch screen control, offset style auto feeder and full length registration table for the bottom sheets, precise hot glue application, accurate, registration between top & bottom sheet and calendaring without air bubbles, with stacker.
