

## AUTOMATIC TOP GLUING CONVEYER

### Technical Data

Case size	-	W 80 - 700mm
Sheet Thickness	-	80 - 600 gsm
Production Speed	-	7-30 pcs/min
Power	-	4.5 HP (415 V)
Weight	-	950 kg

### Features

- Automatic top gluing machine function as automatic paper feed and adhesive application, capable of automatic temperature control, adjustable timing section stop run system with four meter conveyor and calendaring roller for B to B.

Introducing our Automatic Top Gluing Machine, a cutting-edge solution designed to streamline paper feed and adhesive application with unparalleled efficiency and precision. This advanced machine offers fully automated functionality, seamlessly handling the paper feeding process and precise adhesive application, saving valuable time and labour resources.

Equipped with automatic temperature control, our machine ensures optimal adhesive performance, maintaining consistent quality throughout the production process. Additionally, the adjustable timing section conveyor allows for precise customization, enabling operators to fine-tune settings to suit specific production requirements.

Experience the convenience and reliability of automated paper feeding and adhesive application with our Automatic Top Gluing Machine. Whether you're producing packaging materials, labels, or other paper-based products, this machine offers unparalleled efficiency and consistency, allowing you to optimize your production processes and achieve exceptional results.
