

ALBUM CASEMAKER
CB-310

ALBUM CASEMAKER CB-310

The Semi Automatic Case maker is designed to make Album operated by one person and is ideally designed for short run jobs. It is possible to glue with hot gelatin or cold vinyl glues, allowing the application of a case lining in a second-pass operation. Suitable for the production of box files, tabletop calendars, game boards, puzzle boards etc.

The gluing rollers are made of stainless steel for rust-free long life. Special regulation knobs are given for fine adjustment of the glue thickness, on any kind of materials. By use of the special register device in the centre of the sheet, the exact positioning of the two boards and the spine strip are possible by following the print references on the sheet. Suction holes in the surface of the worktable fix the cloth/sheet in place and keep it smooth, and lay guides help to place the case board and centre strip accurately in position.

The single turning unit is designed for flexibility, to work with different materials ensuring a tight corner wrap. After board fixing the case is inserted manually into the turning-in unit for each of the four sides. The calendaring unit removes the air bubbles in the case after turning-in; the rollers can be adjusted according to the thickness of the case.

Technical Data

Min. case size	150mm x 200mm
Max. case size	600mm x 1200mm
Paper thickness	80gsm- 200gsm
Board thickness	1.5mm- 5mm
Turning-in width	15mm- 20mm
Production	3 to 5 cases/min (Approx)
Glue	Hot / cold (Optional)
Power	4.5 HP, 3 Phase, 415 V
Dimensions	H 1300 mm x L1600mm x W 1400 mm
Weight	600 Kgs.
Gluing System	Bottom
Man Power	One
Materials	Paper, Laminated Paper, Plastic coated Paper, Cloth etc.,
