

- Semi Automatic Case maker designed for operation by one or two persons and ideal for short run jobs.
- For book cases, ring files, box files, tabletop calendars, game boards, puzzle boards etc.

SEMI AUTOMATIC CASEMAKER CB-310

CASEMAKER CB-310

Introducing our Semi-Automatic Case Maker, a versatile solution tailored for short-run binding tasks. Ideal for one or two operators, this machine effortlessly produces a variety of items including book cases, ring files, and tabletop calendars. With the flexibility to use hot gelatine or cold vinyl glues, it ensures precise adjustments for optimal glue thickness on diverse materials. Its intuitive design features a register device for exact board and spine strip positioning, alongside suction holes and lay guides for stability and accuracy throughout the process.

Crafted for efficiency and precision, our Semi-Automatic Case Maker streamlines your production process with its single turning unit. This unit accommodates different materials, ensuring tight corner wraps for professional-quality finishes. Moreover, our machine includes a calendaring unit that eliminates air bubbles, guaranteeing a flawless end result. Elevate your binding operations with our innovative Semi-Automatic Case Maker, designed to meet the demands of modern short-run manufacturing.

With a focus on ease of use and impeccable results, our Semi-Automatic Case Maker revolutionizes the binding process. Whether you're creating book cases, ring files, or puzzle boards, this machine delivers consistent performance with its stainless steel gluing rollers and fine adjustment knobs. Its innovative features, including a register device and suction holes, ensure precise positioning and stability throughout production. Experience efficiency and precision like never before with our Semi-Automatic Case Maker, the ultimate solution for short-run binding tasks.

Technical Data

Min. case size	150mm x 150mm
Max. case size	420mm x 700mm
Paper thickness	80gsm - 170gsm
Board thickness	1mm - 6mm
Turning-in width	15mm - 20mm
Production	4 to 6 cases/min (Approx)
Glue	Hot / Cold (Optional)
Power	3.0HP, 3 Phase, 415 Volts
Dimensions	H 1025 mm x L2700mm x W 800 mm
Weight	750Kgs. (Approx)
Gluing System	Bottom
Man Power	Two
Materials	Paper, Laminated Paper, Plastic coated Paper, Cloth etc.,
