

## EDGE SQUARING PRESS KB-850

Introducing our Book Square Press Machine, designed to effortlessly create square-shaped spines reminiscent of perfect bound books. With the ability to open books flat without damaging the spine, this machine allows for easy printing on the spine section, enhancing both aesthetic appeal and functionality. Operating at 850/950 cycles per hour for single copies and accommodating 1 to 4 copies with a maximum opening of 50 mm, our machine ensures efficient production without compromising quality. Utilizing hydraulic pressure for precise clamping and squaring, along with electrical control panels for simplified diagnostics, our Book Square Press Machine offers a user-friendly experience while delivering impeccable results. Whether casing-in stitched book blocks or applying glued cover material, our machine guarantees seamless integration and flawless finishing, making it an essential tool for any book binding operation.

### Technical Data

Book Width	mm	650	850
Book Spine (Min-Max)	mm	5.50	5.50
Book Height (Min)	mm	100	100
System Clamp Pressure (Adjustable)	kgs	9000	9000
Squaring Pressure (Adjustable)	kgs	3500	3500
Power	2 HP, 3 Phase, 415 V		
Hydraulic Oil Capacity	Ltrs	90	110
Overall Dimension (W x D x H)	cms	110x115x100	130x115x100
Net Weight (Approx)	kgs	800	1050
