

Features

- Rigid box V Grooving machine is specifically designed for Box Makers. Book Binder and other card board product manufacturers
- This machine makes V grooving for folding by removing V type material from the cardboard and makes V groove for folding and card board at perfect right angle with good finish and bending
- Fully Automatic board feeding
- Single direction Five lines V grooving

RIGID BOX V GROOVING MACHINE

Introducing our Rigid Box V Grooving Machine, meticulously engineered to meet the precise needs of box makers, book binders, and other cardboard product manufacturers. Designed for efficiency and precision, this machine facilitates V grooving for folding by expertly removing V-shaped material from cardboard, ensuring a perfect right angle for seamless bending and finishing.

Our Rigid Box V Grooving Machine boasts fully automatic board feeding, streamlining the production process for enhanced efficiency and productivity. With single-directional four-line V grooving capability, this machine delivers consistent and precise results, meeting the demanding standards of modern manufacturing environments.

Experience unparalleled precision and reliability with our Rigid Box V Grooving Machine, an indispensable tool for crafting high-quality rigid boxes, book covers, and various cardboard products. Elevate your production capabilities and achieve exceptional results with this advanced and versatile machine.

Technical Data

Board size minimum	-	200 mm
Board size maximum	-	900 mm
Cutting Width minimum	-	30 mm
Cutting Width Maximum	-	850 mm
Board Thickness	-	1 - 6 mm
Mechanical Speed	-	30 - 300 meters/min
Power	-	2.25 hp
Weight	-	800 kg
